

Artifact: UAT Test Scenarios & Traceability Matrix

Purpose

This artifact demonstrates how business objectives and functional requirements were validated through defined test scenarios, ensuring alignment between intent, implementation, and expected outcomes.

What This Demonstrates

- End-to-end traceability from business objective to test case
- Ability to define clear, verifiable acceptance criteria
- Support for UAT planning and execution
- Risk reduction through structured validation

How to Review

Focus on:

- Completeness of traceability
- Testability of requirements
- Coverage of performance, autonomy, and privacy considerations
